### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 15, and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamada et al. (U.S. Patent 5,133,302).

As per claims 1 and 21, Yamada et al. discloses:

A method/apparatus for controlling a cooling fan unit of a vehicle, the cooling fan unit including at least one cooling fan 112, the method/apparatus comprising:

detecting a plurality of vehicle parameters including a coolant temperature (sensor 2) and a vehicle speed (sensor 1);

determining a driving load of the cooling fan unit corresponding to the vehicle parameters on the basis of a plurality of temperature ranges of the coolant temperature and a plurality of speed ranges of the vehicle speed (ranges as shown in Figures 3A, 3B, and 4), the driving load being selectively determined from a plurality of predetermined loads (low S7 or high S8); and

operating the cooling fan unit at the determined driving load (Figure 3A).

As per claim 2, Yamada et al. discloses a reference temperature (e.g., 95°C in step S2; 105°C in step S6) and reference speed (e.g., 20km/h in step S1).

As per claim 3, Yamada et al. discloses coolant reference temperature at step S6 being chosen based on A/C switch decision of S3 (Figure 3A).

As per claim 4, Yamada et al. further teaches pressure switch setting of step S4 determining if temperature reference of step S6 is chosen (Figure 3A).

As per claim 15, the speeds and temperatures are based on a system having an air conditioning system.

## Allowable Subject Matter

Claims 5-14 and 16-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc E. Norman whose telephone number is 571-272-4812. The examiner can normally be reached on Mon.-Fri., 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Denise Esquivel can be reached on 571-272-4808. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
